EDUCATION

Bachelor Of Computer Application
At Dharmsinh Desai University | 2026
CGPA : 7.5 / 10

TECHNICAL SKILLS

Backend Frameworks

- FastAPI
- Django
- Flask

Databases

- PostgreSQL
- MySql
- MongoDB
- SQLAlchemy

ML/AI

- Scikit-Learn
- XGBoost
- Polaras
- Plotly / Matplotlib

DevOps & Tools

- Git
- Docker
- Jenkins
- Prometheus

HET RAVAL

P Y T H O N B A C K E N D D E V E L O P E R

SUMMARY

BCA graduate and Python Backend Developer with hands-on experience building production-grade REST APIs using FastAPI and PostgreSQL. Completed a backend development internship and independently built multiple projects spanning real-time systems. Comfortable working across backend engineering and data-driven applications, with a focus on clean architecture and scalable system design.

EXPERIENCE

Python Backend Developer — Intern | Dec 2025 - Mar 2026
Haronex Technology

- Developed and maintained REST APIs using Python and FastAPI for production use
- Contributed to backend architecture of a community-based matrimonial platform, handling user management and event workflows
- Designed relational database schemas and implemented CRUD operations using PostgreSQL and SQLAlchemy
- Participated in peer code reviews and identified performance bottlenecks to optimize API response times

PROJECTS

Matrimony — Community-Based Matrimonial Platform
(Built during Internship at Haronex Technology)

- Built a role-based backend system using FastAPI and PostgreSQL supporting user profiles, connections, and event management
- Implemented JWT-based authentication and authorization for secure API access
- Designed scalable REST API architecture following separation of concerns principles

Tech: Python, FastAPI, SQLAlchemy, PostgreSQL, SQLite, JWT, Pydantic, dotenv

Anomalyze — Real-Time Network Anomaly Detection

- Engineered a real-time anomaly detection pipeline using IsolationForest to identify irregular network behavior
- Automated model training and scheduled periodic inference using APScheduler
- Delivered live alerts to clients via WebSocket streaming

Tech: Python, FastAPI, scikit-learn, APScheduler, WebSockets, SQLAlchemy, PostgreSQL, NumPy, Pandas

CrimeScope — Urban Crime Intelligence & Forecasting

- Built a crime prediction pipeline using XGBoost and Facebook Prophet for time-series forecasting
- Integrated a Retrieval-Augmented Generation (RAG) chatbot using LangChain and Gemini API for natural language querying of crime data
- Performed exploratory data analysis and built interactive visualizations for crime trend reporting

Tech: Python, FastAPI, XGBoost, Facebook Prophet, LangChain, Gemini API, ChromaDB, Polars, scikit-learn, Plotly, OpenCV, RAG Architecture
